- Removable vehicle dock
- Expanded wired I/O
- Multiple interface options
- Rugged tablet mounting

The CRD1065 is a full-featured removable dock for the MDT1065 rugged tablet. It is designed as a flexible docking platform for vehicle installations and supports several interface configurations depending on the selected cable set and system design.

Available configurations include dual RS232 plus RS485 and GPIO, dual serial plus camera-hub connectivity, three USB OTG ports, or a single RS232 plus camera-hub setup. This makes the CRD1065 an excellent solution for installations that need power, robust mounting and expanded wired I/O.

Compatible with: Topicon MDT1065
