- Basic Vehicle Cradle
- 12-24 V Vehicle Charging
- RS232 Interface
- USB OTG Connection

The CRD1065-BAS is a basic vehicle cradle for the MDT1065 rugged tablet. It supports vehicle charging from 12 to 24 V and provides ignition, ground, one RS232 interface and one OTG connection.

It is a practical cradle option for applications that need dependable in-vehicle power and essential wired connectivity without the complexity of a full-featured dock.
