- 6 charging channels
- For MDT1065 batteries
- AC 220 V input
- 60 W maximum power

The STA-1065-01 is a multi-bay battery charging station for MDT1065 replacement batteries. It supports AC 220 V input at 50/60 Hz with a maximum power of 60 W and delivers DC 4.2 V / 2 A across six charging channels.

It is a practical charging solution for fleet, depot and workshop environments where several spare batteries must be charged efficiently.

**Compatible with:** Topicon MDT1065
